

# Building Inspection Notification

Pursuant to Section 59 of the Development Act, 1993 the City of Port Adelaide Enfield requires a licensed building work contractor who is proposing to undertake the work or who is in charge of carrying out the work, or if there is no such licensed building work contractor, the building owner must give the Council one business days' notice of the following.

## Tick the relevant stage of notification

Commencement of building work upon site;

Completion of structural steel reinforcement for concrete footings or other floors prior to concrete pour;

Completion of wall framing prior to installation of linings;

Completion of all roof framing forming part of the building work prior to the installation of the roof covering (including top and bottom chord restraints, bracing and tie-downs);

Completion of any fire walls, fire rated separation or smoke barriers, prior to the installation of linings or other building components rendering inspection not possible;

Completion of building work;

## In relation to verandahs or carports attached to the roof framing of a building.

Completion of the installation all roof framing fixings and connections to the existing building used to support the attached structure.

## In relation to swimming pools

Completion of safety barriers (prior to the swimming pool being filled with water).
