

Bee Bath

Materials:

- Shallow dish
- Rocks
- Water

Method:

- Place rocks evenly around the bottom of your dish to create islands or 'landing pads' for bees.
- Pour water carefully around the bottom of your dish.
- Keep the top of your rocks dry. This ensures the bees don't get stuck in the water and can safely get a drink.
- Put your Bee Bath in your garden and watch from a safe distance to see if the bees use it!
